DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-7, 9, 13-23, drawn to a method of treating a subject comprising increasing TSP-2 activity, by administering a TSP-2 polypeptide or analog, classified in class 514, subclass 2.
 - II. Claims 1-2, 8, 13-23, drawn to a method of treating a subject comprising increasing TSP-2 activity, by administering a nucleic acid encoding a TSP-2 polypeptide or analog, classified in class 536, subclass 23.5.
 - III. Claims 1 and 10-12, drawn to increasing TSP-2 activity by increasing endogenous TSP-2 activity, classified in class 514, subclass 44.
 - IV. Claims 1, 24, and 25, drawn to increasing TSP-2 activity by introducing a genetically modified cell, classified in class 424, subclass 93.2.
 - V. Claims 26-43, drawn to a method of treating an unwanted skin condition comprising modulating TSP-2 activity, by administering a TSP-2 polypeptide, classified in class 514, subclass 2.
 - VI. Claims 26-43, drawn to a method of treating an unwanted skin condition comprising modulating TSP-2 activity, by administering a TSP-2 encoding nucleic acid, classified in class 514, subclass 44.
 - VII. Claims 44-49, drawn to a method of evaluating if a subject is at risk for unwanted proliferation, comprising evaluating the presence of a TSP-2 protein, classified in class 435, subclass 4.
 - VIII. Claims 44-49, drawn to a method of evaluating if a subject is at risk for unwanted proliferation, comprising evaluating the presence of a TSP-2 nucleic acid, classified in class 435, subclass 6.
 - IX. Claims 50-52, drawn to a method of identifying a compound which can be used to treat a disorder, comprising determining the level of TSP-2 protein, classified in class 424, subclass 9.1.

X. Claims 50-52, drawn to a method of identifying a compound which can be used to treat a disorder, comprising determining the level of TSP-2 nucleic acid, classified in class 514, subclass 44.

2. The methods of Groups I and X relate to methods but each method differs in method steps, modes of operation, reagents needed and serve different endpoints and effects.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, divergent subject matter, and require different search strategies, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the response to this requirement, to be complete, must include an election of the invention to be examined even though the requirement be traversed.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
